

Developing an ICS Data Strategy and Capability

Ruth Holland – Deputy CIO, Imperial College Healthcare NHS Trust &
London Branch Lead, AphA

Rony Arafin – Head of Analytics, NHS England and Improvement &
Chief Operating Officer, AphA

ICS Guidance & Trends

National guidance:

- Digital and data - pivotal role in supporting transformation
- Cross-system intelligence function
- Population health management capabilities

National trends:

- 'Levelling up' - coverage of EPRs across ICSs
- Increase in number and granularity of mandatory datasets
- Streamlined corporate services

Developing an ICS Data Strategy

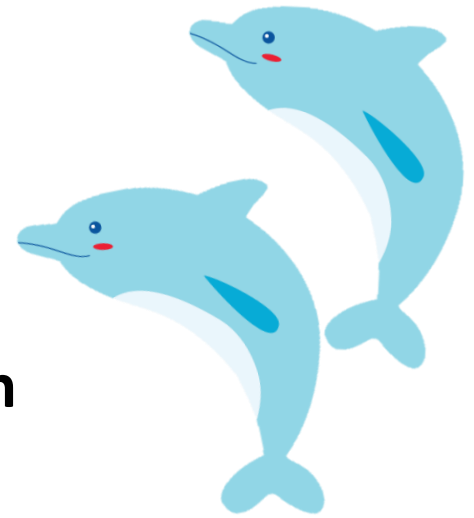

- Costed data and digital transformation plans by June 2022
- Strengthen Data & Analytics Leadership
- Analytics workforce capability

AphA Purpose

Our purpose is to **raise the profile of and represent the voice of health and care analysts as a recognised and respected industry expert**, by providing a professional framework and an established support network.

We help our members to drive up the quality and application of analytics to improve experience in a fast paced and dynamic health and care system.

AphA is leading on:

- Recognition of Analytics as a Scientific Profession
- Analyst Professional Registration – Accreditation
- Analyst Competency Framework Development with NHSX and NHS England and Improvement
