LESSONS LEARNT

Organisation

- Strong programme & project management required
- Clear and achievable delivery plan that is funded
- Mix of data providers and data consumers required
- Regular contact and communication across all partners

Technical

- Be clear & honest about level of technical maturity/knowledge – open systems/platforms/standards – across all partners – additional support may be needed
- Identify early the required data standards and apply consistently – e.g FHIR
- Don't skimp on testing – data and infrastructure – involve end users

Sector Specific (LA Social Care)

- Use existing information standards (i.e. PRSB) but be prepared to adapt
- Be clear on the actual benefits to social care – use-cases are vital
- Watch for terminology/labels that don't speak to a social care audience – e.g. patient, clinician, clinical safety

Laura Godtschalk

Collaboration at LLR Care Record

Yorkshire & Humber Care Record

Local

- Cross-org work streams
- System suppliers
- Aligning configuration and mapping
- Collaboration between health and social care systems
- Linking in with other projects to reduce duplication

YHCR

- Shared knowledge
- Driving forward development
- Utilising existing methods & documents
- Central team but also wider ICS's
- Partnering with technical groups

National

- ShCR National Group
- National Benefits and Evaluation Group
- Unified voice for development
- PRSB Information architects
- Shared learning and open door

Shared Records – a Journey of Collaboration – Where to next for our ICS …

Yorkshire & Humber
Care Record

Upskill and embed
- Benefits
- Develop a trained local team: part of the long-term support model
- ShCR embedded in ICS future delivery

Make Sustainable
- Repeatable / Scalable methods
- Tools and governance
- Data standards

Build Out
- Onboard new organisations
- Tackle next level systemwide challenges
- Onboard new marketplaces
- New dataset definitions

Extend:
- Maturity
- Scale up
- Support Model

MATURITY, ADOPTION, VALUE, BENEFITS
