Digital Engagement with health and care systems

Neville Young,
Director of Enterprise & Innovation
Neville.young@yhahsn.com

A person in a blue lab coat is holding a tablet. The background is a futuristic, blue-toned digital interface with various medical icons, data charts, and text. The interface includes a grid of hexagonal icons representing different medical fields like 'MEDICAL', 'HEALTH CARE', 'DOCTOR', 'HOSPITAL', 'PHARMACIST', 'NURSE', 'DENTIST', 'FIRST AID', 'SURGEON', and 'EMERGENCY'. There are also charts, a globe, and a chemical structure labeled 'Guanine'. The overall theme is medical technology and innovation.

**Adoption and spread of
innovation remains a key
challenge**

**Machine
learning
for cancer
diagnostics**

Our approach is to work with ICSs

**Innovation is
at the heart
of ICS
transformation**

1

Invested significant time in building strong relationships with key people in our regional ICSs

2

Worked at ICS level to ensure we identify and meet the issues facing the NHS at a population level

3

Integrated ourselves into the structure and governance of the three ICSs in our region

4

Taken a bespoke approach to engaging with each individual system
