Frontline Digitisation Support Offer

Collaboration, Knowledge, Expertise

Key Considerations

What we see as key considerations for a successful EPR implementation :

1

Leadership

- Clinically led and what this means for frontline staff
- Integrated into key operational and digital leadership priorities
- Focus on the sustainable transformation to be enabled

2

Effective Planning

- Resource, Governance and Data including pre- and post-live
- Transforming Clinical Pathways
- End to end strategy
- National and Operational reporting readiness

3

Engagement

- Communications
- Upskilling
- Benefits Ownership
- Change Management
- Ongoing Delivery and Clinical Engagement

Across the end-to-end EPR implementation, we have a set of priority focus areas:

Data Migration

Go-live Readiness

Stabilisation

Optimisation

How Our Offer Supports Optimisation

The FDSO offer supports the prioritisation areas by:

Tools and Guidance - available on the online Hub to provide useful documentation for priority topics

Community of Practice – forum for discussions driven by individuals to areas of their requirement

Subject Matter Expertise – Provide advice, consultancy and intervention that may not exist at a local level

Learning Labs – Tailored workshops alongside peers to provide hands on provider support to lead their transformation journeys

Peer Support – ongoing sustainable peer networks with similar challenges to share across transformation journeys

Tailored Events and Master Classes - for each stage of the end-to-end transformation journey
