Healthcare 2023

A Perfect Storm!

The Problem

- Economy

- Budgets/Austerity

- Post-COVID new reality – patients are sicker!

- Backlog of care needs, projects

- Overcrowding

- Clinical and staff burnout and shortages

- Resource strain, lack of IT staff/financing

- Increasing cybersecurity threats, ransomware attacks

- Digital transformation is hard – like adolescence?

The Solution – Change the Paradigm

Security

Compliance

Privacy

AND

Productivity

Efficiency

Usability

"Let me do my job!!!!"

Solutions

Improve care quality

Clinicians can't wait for access to systems and applications when lives are on the line.

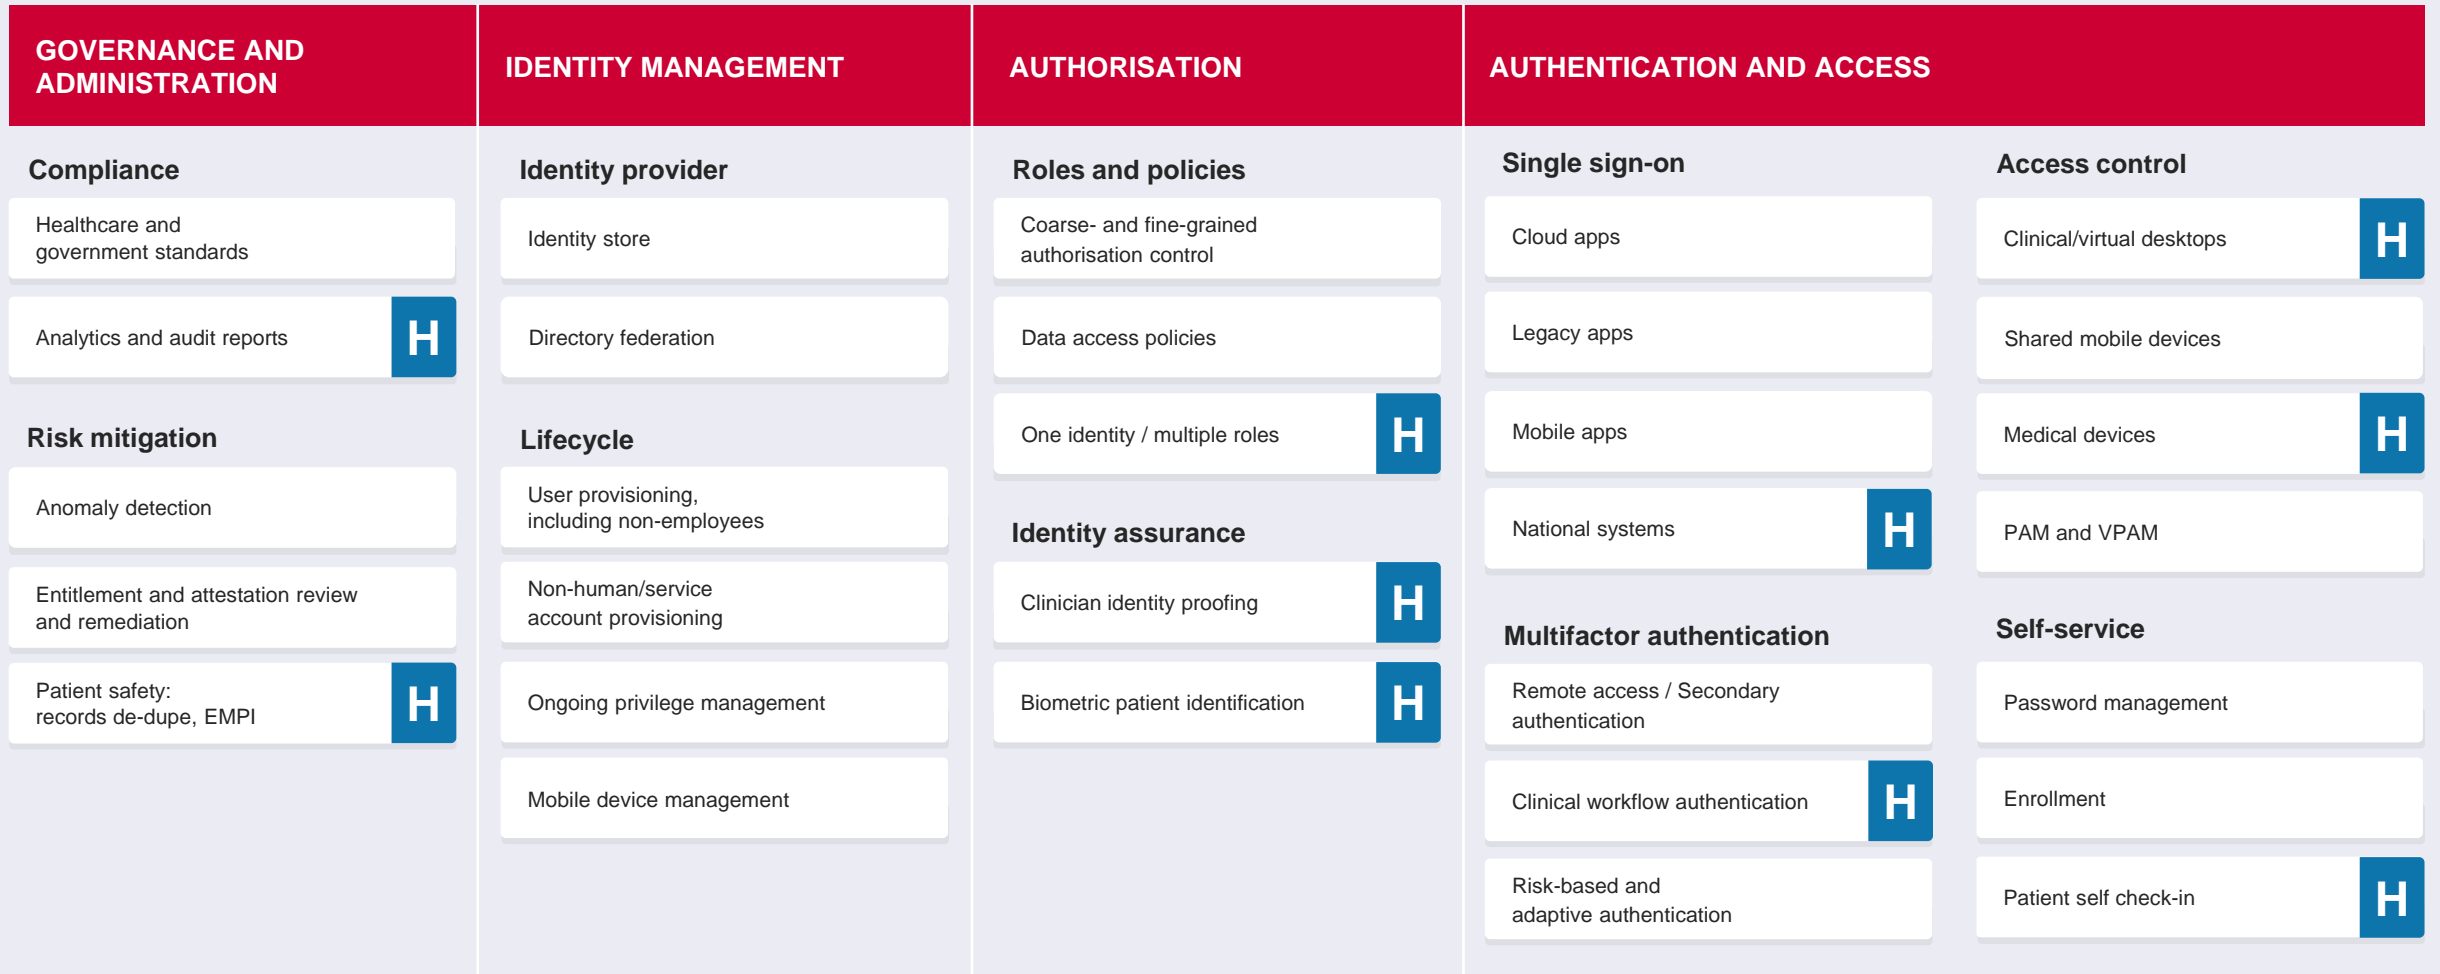

Reduce cyber risks

Healthcare is the world's most critical infrastructure and always under attack.

Put privacy first

Regulations require, and patients demand, protection of sensitive data at all times.

Imprivata Digital Identity Framework

GOVERNANCE AND ADMINISTRATION	IDENTITY MANAGEMENT	AUTHORISATION	AUTHENTICATION AND ACCESS	

Compliance

Healthcare and government standards

Analytics and audit reports **H**

Risk mitigation

Anomaly detection

Entitlement and attestation review and remediation

Patient safety: records de-dupe, EMPI **H**

Identity provider

Identity store

Directory federation

Lifecycle

User provisioning, including non-employees

Non-human/service account provisioning

Ongoing privilege management

Mobile device management

Roles and policies

Coarse- and fine-grained authorisation control

Data access policies

One identity / multiple roles **H**

Identity assurance

Clinician identity proofing **H**

Biometric patient identification **H**

Single sign-on

Cloud apps

Legacy apps

Mobile apps

National systems **H**

Multifactor authentication

Remote access / Secondary authentication

Clinical workflow authentication **H**

Risk-based and adaptive authentication

Access control

Clinical/virtual desktops **H**

Shared mobile devices

Medical devices **H**

PAM and VPAM

Self-service

Password management

Enrollment

Patient self check-in **H**
