**CYBER
SECURITY
STAGE**

Stage Sponsor:

Build An Effective C.I.A.

Cyber Intelligence Agency!

Your eyes on the price

Security of your
assets

Security of your
data

Security of your
people

Security of your
patients/service
users

Data Security and
Protection Toolkit

Certification
(Cyber Essential +, ISO)

Keep a step ahead, always

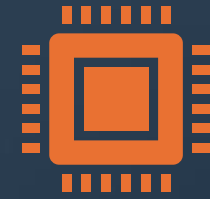

Governance

The Data Security and Protection Toolkit is changing
→ Look out for the CAF
(Cyber Assurance Framework)

People - Your staff are key to make it work:

They are your information asset owners and custodians
They are the one who would affect your security posture
Cyber Team identify and manage risks
Staff are your first and last line of defence

Systems

The defence systems are improving as are the new strikes – the use of Artificial Intelligence is two-folds and can be both your blue and your red team!

And so how?

Cyber
Strategy

**A dedicate
Cyber
resource –
your own SOC**

**Nurture new staff (NHS Graduate, Apprenticeship)
Define roles and responsibilities, and how they
interact with the rest of the Department
Strong links between your Cyber and your IG functions**

**Fit for
purpose tool**

**Get the minimum needed open sources to well-
advanced to get the level of assurance you need
Review your infrastructure, and streamline your
systems and applications to reduce your exposure
Prioritise on the high-risk high impact vulnerabilities**

**Plan for a
better CIA**

**Think about what would be your next best priorities
Document it so that if you have a funding opportunity
Have your Board onboard? If you are not the champion,
find one, explore non-exec support as well**
