Digital Transformation at Scale

Rachel Hope
NHS England

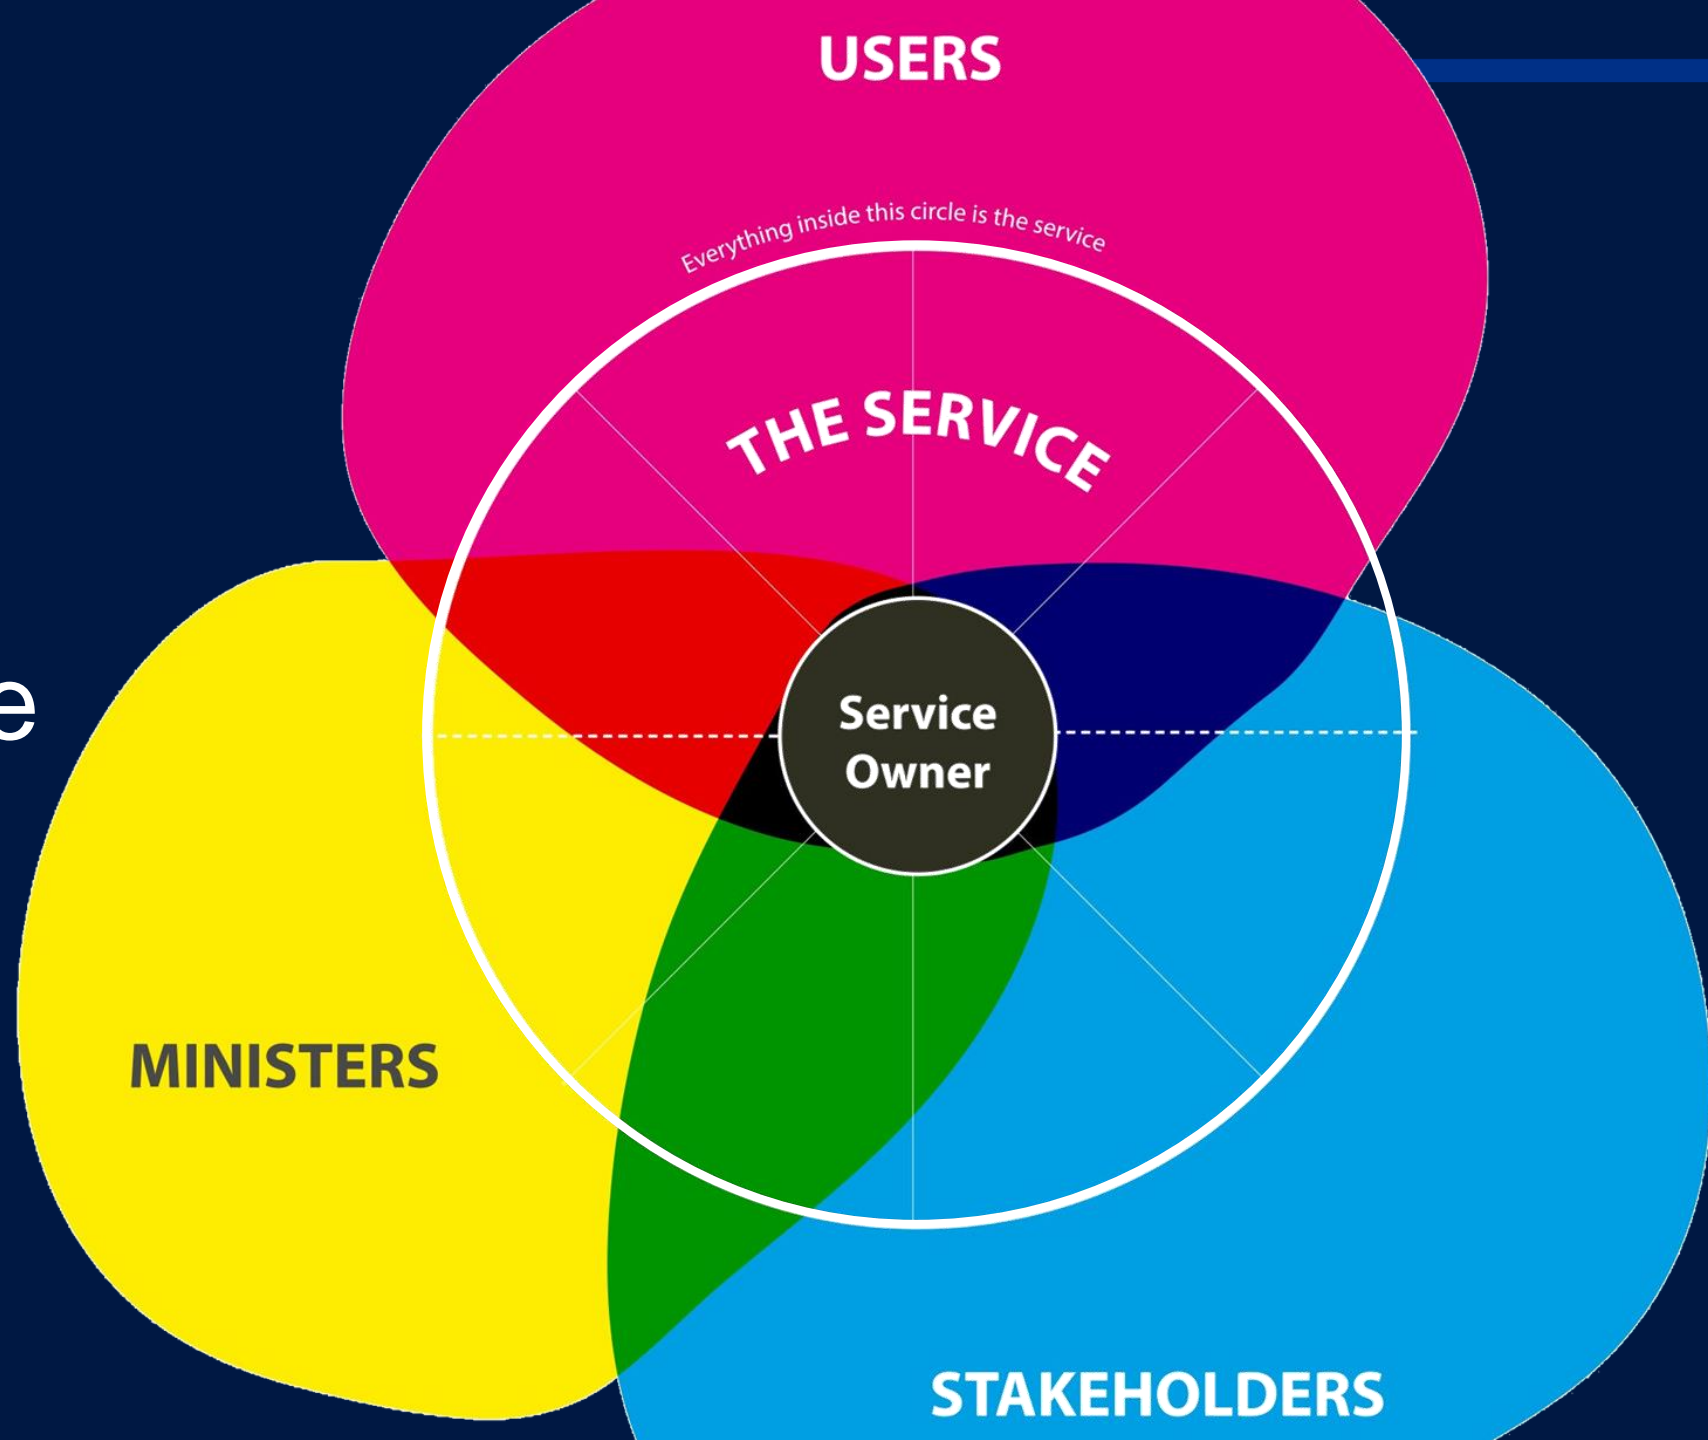

At the spring budget,
we were given an extra

**£3.4 billion to reform the
way the NHS works...**

...with the hope it turns the NHS into one of
the most **digitally enabled,**
productive healthcare systems
in the world

What have we learned over the last decade?

**Have we
lost our way?**

**So, what's really
needed now to
support digital
transformation at
scale**

1. Strong vision for a **digitally** transformed NHS

2. Collaboration parity, alignment among leaders

3. Funding for services and people, not programmes and technology

4. Get serious about hiring digital talent across the entirety of the NHS – and creating a performance culture

5. Change the commercials

**But all of this needs
sponsorship - and
allies. It needs you!**
