PRECISIA[®]

CLINICAL RISK ANALYTICS IN LIFE SCIENCES
'Because there is no average patient'

POWERED BY C2-AI

Digital Health Rewired March 2024

Dr Sheuli Porkess, CMO, Precisia C2-Ai

INFORMING STRATEGY & MONITORING OUTCOMES

C2-Ai analytics applied across health and life sciences cohorts

Healthcare Analytics

HEALTHCARE

C2-Ai's globally unique approach utilising multifactorial analysis of clinical risk and risk-adjusted outcomes detects and helps resolve hidden issues across acute care and beyond.

POPULATION HEALTH

Precision clinical risk-adjustment across large patient populations

- Geographical
- Specialty
- Disease

Understand the population and target programmes with unique insights on risk, acuity, quality of outcomes, SDoH and EID impact

PRECISIA[®] Analytics

LIFE SCIENCES

Supporting improved development, delivery and access to new Life Science solutions through accurate, multi-factorial risk-adjustment, cohort stratification at scale and optimal service configuration and delivery

C2-Ai
 Precision Healthcare Analytics

450m records processed

47 countries providing data

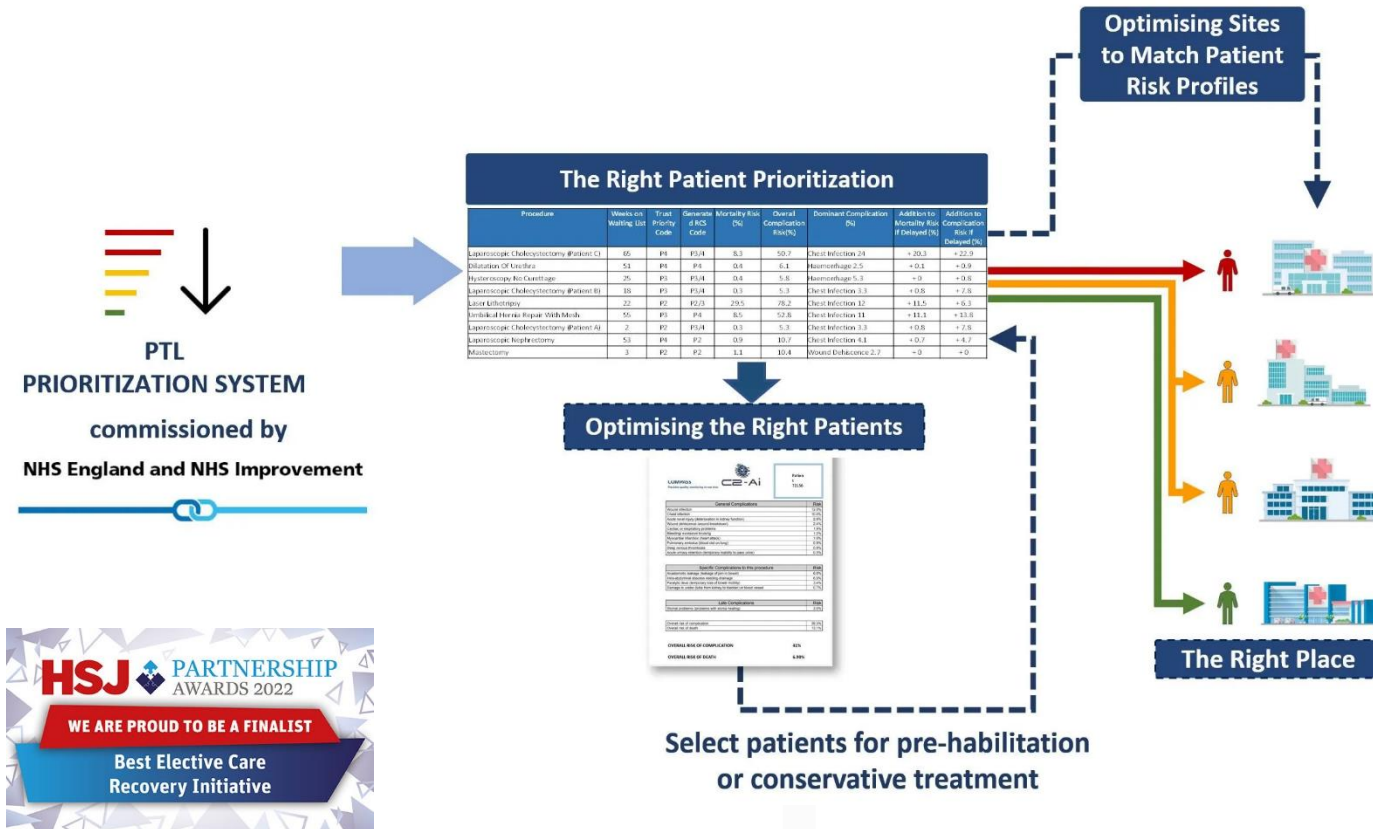

15 yrs of real-world development built on 30 yrs research

C2-Ai example of risk-assessment and stratification

“The right patient in the right place at the right time” - waiting list for elective procedures

Risk-adjustment for mortality, complications, deterioration at patient level

IMPROVEMENT SAVINGS

 **+5 mins saved** of clinician time per patient per prioritization

 **8% reduction** in A&E admissions

 **125 bed-days saved** per 1000 patients on PTL

SYSTEM IS TRUSTED

 **15%** of cases have a priority mismatch (system priority vs C2-Ai system)

- **95%** Clinicians concurred with C2-Ai reprioritisation
- **5%** unchanged due to qualitative factors captured in score matrix

 **27%** reduction in >52 weeks waits and highest priority scoring patients

GIRFT Elective Recovery High Volume Low Complexity (HVLC) guide for system, November 2021

C2-Ai example of risk-assessment and stratification

“Turning the waiting list into a preparation list”

Results for first 150 patients, EBPOM World Congress for Prehabilitation Medicine, July 2023

	Intervention Group	Control Group
Post-op complication incidence	6%	13%
HAP incidence	0.0%	5.2%
Avg. Actual LoS (days)	3	5
Avg. Expected LoS (days)	7	5
LoS Difference (days)	-4	0
Conversion to day case	35%	26%
Post-op deaths	0	1

Pritchard-Jones R, Huddleston R, Ratnarajah M. Transforming surgical waiting lists into preparation lists. Poster at EBPOM World Congress for Prehabilitation Medicine, July 2023

C2-Ai has offices in St. Petersburg, Florida, and Cambridge, United Kingdom
